CMG Classic Bear/Bull	HFRI Macro: Systematic Diversified Index	60% S&P 500 / 40% Barclays Aggregate Bond

## CMG Comparative Benchmarks

**Barclays Aggregate Bond Index** – The Barclays Aggregate Bond Index measures the performance of all U.S. investment grade bonds.

**Barclay Equity Long Short Index** – The Barclay Equity Long Short Index tracks the monthly performance of managers that use a directional long short strategy with the objective of not being market neutral. The manager must show the ability to shift from value to growth as well as shifting from small to medium to large cap stocks including the ability to move from a long to short position.

**Barclays High Yield Credit Bond Index** – The Barclays Capital High Yield Credit Bond Index is a total return performance benchmark for fixed income securities. The index covers the US dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market. Securities are classified as high-yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+ or below.

**Barclays Capital Long-Term Treasury Index** – The Barclays Capital Long-Term Treasury Index includes all publicly issued, U.S. Treasury securities that have a remaining maturity of 10 or more years, are rated investment grade, and have \$205 million or more of outstanding face value.

**Dow Jones Wilshire U.S. 5000 Total Market Index** – The Dow Jones Wilshire U.S. 5000 Total Market Index measures the performance of U.S. companies who are both headquartered domestically and are actively traded on an American stock exchange. The index is the broadest index currently tracking over 5,000 companies over all sectors of the market.

**HFRI Macro: Systematic Diversified Index** – The Hedge Fund Research, Inc. (HFRI) Macro: Systematic Diversified Index tracks strategies using investment procedures that identify market opportunities containing trending or momentum characteristics across asset classes and other instruments. These strategies normally focus on instruments that are highly liquid with short holding periods. There should be no more than 35% exposure to currencies or commodities across the portfolio.

**S&P 500 Total Return Index** - The S&P 500 Total Return Index (the "S&P") is a market capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market. Standard & Poor's chooses the member companies for the S&P based on market size, liquidity, and industry group representation. Included are the common stocks of industrial, financial, utility, and transportation companies. Total return indices reflect the reinvestment of interest, capital gains, distributions and dividends.

**Traditional Stock and Bond Portfolio** – 60% S&P 500 Total Return Index and 40% Barclays Aggregate Bond Index, rebalanced to reflect a traditional allocation of a balanced stock/bond portfolio.\*\*\*

\*\*\*Managed Blends are rebalanced quarterly and Classic Blends are rebalanced yearly. The benchmark is rebalanced accordingly. With respect to the CMG Opportunistic All Asset ETF Strategy, the benchmark reflects annual rebalancing\*\*\*

### CMG Capital Management Group, Inc. Disclosure Statement

CMG Capital Management Group, Inc. ("CMG") is an SEC registered investment adviser located in the Commonwealth of Pennsylvania.

Past performance may not be indicative of future results. Therefore, no current or prospective client should assume that future performance will be profitable, or equal to either the hypothetical CMG performance results reflected or any corresponding historical index. The composition/percentage weighting of each corresponding CMG index (i.e. S&P Total Return, Barclays Aggregate Bond, etc.) is also disclosed. For example, the S&P 500 Total Return Composite Index (the "S&P") is a market capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market. Standard & Poor's chooses the member companies for the S&P based on market size, liquidity, and industry group representation. Included are the common stocks of industrial, financial, utility, and transportation companies. The historical performance results of the S&P (and those of all other indices) do not reflect the deduction of transaction and custodial charges, nor the deduction of an investment management fee, the incurrence of which would have the effect of decreasing indicated historical performance results. The S&P is not an index into which an investor can directly invest. The benchmarks are provided exclusively for comparison purposes only, so as to provide general comparative information to assist an individual client or prospective client in determining whether the performance of a CMG portfolio performance meets, or continues to meet, his/her investment objective(s). It should not be assumed that CMG program holdings will correspond directly to any such comparative index. The CMG performance results do not reflect the impact of taxes.

In the event that there has been a change in a client's investment objectives or financial situation, he/she/it is encouraged to advise CMG immediately. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investment strategies devised or undertaken by CMG) will be profitable for a client's or prospective client's portfolio. All performance results have been compiled solely by CMG and have not been independently verified. Information pertaining to CMG's advisory operations, services, and fees is set forth in CMG's current disclosure statement, a copy of which is available from CMG upon request (or on CMG's website, [www.cmgwealth.com/disclosures/advs](http://www.cmgwealth.com/disclosures/advs)).
