CMG Capital Management Group, Inc. (“CMG” or the “Advisor”) is an SEC registered investment adviser located in the Commonwealth of Pennsylvania. CMG claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CMG has been independently verified for the periods January 2007 – December 2014. The verification report and CMG’s GIPS Policies and Procedures are available upon request.

Net performance composite results are presented in US dollars, reflect the deduction of investment advisory fees, transaction costs, custodial fees, administrative fees and reflect the reinvestment of dividends and capital gains. The investment management fee schedule for the composite is 2.50%, the highest fee paid by a client. Actual fees may vary based on, among other factors, account size and custodial relationship. Individual returns may vary substantially from those presented due to differences in the timing of contributions and withdrawals, account start dates and actual fees paid.

CMG Opportunistic All Asset Strategy

The CMG Opportunistic All Asset Strategy is a rules based, tactical investment strategy that analyzes a global universe of investment options to determine an optimal portfolio allocation. The portfolio construction process utilizes a proprietary relative strength ranking system to capitalize on opportunities across US equity, International Equity, Fixed Income and Commodity markets. The strategy seeks to position in up to 11 exchange traded funds (ETFs) or mutual funds exhibiting the strongest relative strength leadership. The investment objective is moderate growth with downside protection.

CMG Tactical Rotation Strategy

The CMG Tactical Rotation Strategy seeks to generate returns in all market conditions based on the concept that various asset classes and sectors experience bull and bear markets at different times. The strategy utilizes a proprietary tactical investment model that analyzes various technical indicators to determine which asset classes are in a bullish environment and likely to achieve a positive return. The strategy employs an equally weighted strategic rotation process which allocates the portfolio to the top two asset classes from a universe of six: Domestic Equities, International Equities, Bonds, Commodities, REITs, and Cash. The investment objective is moderate growth with downside protection.

CMG Managed High Yield Bond Program

The CMG Managed High Yield Bond Program trades high yield mutual funds and/or ETFs using a proprietary quantitative buy/sell/hold investment process. The model identifies opportunities where the short-term and intermediate-term direction of the U.S. high yield market can be predicted with high probability. The strategy looks at daily data such as price, volume, yield spreads and default rates to identify trends. This composite only contains data derived from separately managed accounts. The investment objective is growth and income with downside protection.

Scotia Partners Dynamic Momentum Program

The Scotia Partners Dynamic Momentum Program is a long-only, momentum based strategy that utilizes the Rydex-SGI sector funds. The strategy analyzes momentum and volatility to determine which sectors present the best investment opportunities. Scotia Dynamic allocates capital to the funds demonstrating positive price momentum and overweight’s to funds that exhibit both strong momentum and low volatility. The investment objective is aggressive growth with downside protection.

Past performance may not be indicative of future results. Therefore, no current or prospective client should assume that future performance will be profitable, or equal to any corresponding historical index. For example, the S&P 500 Composite Total Return Index (the “S&P”) is a market capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market. Standard & Poor’s chooses the member companies for the S&P based on market size, liquidity, and industry group representation. The historical performance results of the S&P (and those of all indices) do not reflect the deduction of transaction and custodial charges, nor the deduction of an investment management fee, the incurrence of which would have the effect of decreasing indicated historical performance results. For example, the deduction of the combined annual advisory and transaction fees of 1.00% over a 10 year period would decrease a 10% gross return to an 8.9% net return. The S&P is not an index into which an investor can directly invest. The historical S&P performance results (and those of all other indices) are provided exclusively for comparison purposes only, so as to provide general comparative information to assist an individual client or prospective client in determining whether the performance of CMG’s portfolio meets, or continues to meet, his/her investment objective(s). A corresponding description of the other comparative indices is available from CMG upon request. It should not be assumed that any CMG holdings will correspond directly to any such comparative index. The CMG performance results do not reflect the impact of taxes.

In the event that there has been a change in a client's investment objectives or financial situation, he/she/it is encouraged to advise CMG immediately. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investment strategies devised or undertaken by CMG) will be profitable for a client's or prospective client's portfolio. All performance results have been compiled solely by CMG and have not been independently verified. This report contains estimated performance results that may be subject to change. Information pertaining to CMG's advisory operations, services, and fees is set forth in CMG's current disclosure statement, a copy of which is available from CMG upon request (or on CMG's website, www.cmgwealth.com/disclosures/adv).

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE PERFORMANCE
